An **ominous** warning about the coming Summer Olympic Games in Rio in 2016! And this comes from a vice president of the IOC who has surveyed the preparations there, says they are the worst he's ever experienced! IOC member John Cot said he's made 6 trips and Brazilians are behind "in many, many ways" He says the IOC is very concerned and plans to get more involved because, as he put it, there is no plan B.

This was a big day for Star Wars fans, reacting to the news from here in Hollywood that Han Solo, Luke Skywalker and Princess Leia would all be returning to their original roles. Harrison Ford, Mark Hamill, Kerry Fisher signing on to lead the cast to the new film Star Wars Episode 7, hitting theaters in time for Christmas of 2105.

It was one of the great engines of our country. It became one of the engines of the World War Two effort and now a group in Detroit is a million dollar **shy** of the money they need to preserve just a portion of the famous **Willow Run Plant**! The old Ford assembly line where, during World War Two, they built roughly one B24 bomber per hour, close to 9,000 of them in all! 1000s of women worked in the plant as the **Rosie the Riveter** icon came to symbolize their role in the war effort on the home front! Thursday is the deadline to save part of the building for those looking to contribute. There is more information tonight on our website and on our FACEBOOK page!

And a big day here in Los Angeles where our NBC News LA Bureau is now officially a part of The Brakaw News Center. Today our news headquarters on the Universal Lot **was dedicated** for the 23 year veteran of this broadcast who started as a local anchor and correspondent here in LA in 1965! It was a day of **tributes kept off by** Tom himself, thanking his coworkers and his family for all the miles travelled and the stories covered and for keeping the home front running all the while!
