One of the most closely monitored potential terror targets! So how did someone raised white flags atop the Brooklyn Bridge? Michel Miller reports! And Cheap Lead on why tourists are travelling 1000s of miles for a taste of New England! The Brooklyn Bridge of course is one of America's most famous landmarks! And that has made it a target for terror **plots** and the focus of constant monitoring by the police. Still as Michel Miller tells us someone managed to reach the top of the bridge overnight and replaced 2 American flags.

The **appearance** of the 20 foot tall white flags is a major embarrassment for the NYC Police Department and its **commissioner** William Bratten! "No matter what the motive was that is a matter of a concern! I am not particularly happy!" The Brooklyn Bridge is under watch **24/7** with camera surveillance and patrol cars at both ends. John Miller is the **deputy commissioner** for intelligence and counter terrorism. "Video shows us a number of people crossing the bridge! The light normally **illuminates** the American flag on the Brooklyn side of the bridge, first **flickers** and then appears to go out!" Carefully fitted aluminum covers were used to kill the lights. And white flags were not spotted until this morning!

Getting to the top of the 27 storied tall towers is not easy. Access is possible only thru locked gate and then it's a quarter of a mile climb on a foot wide cable high over the East River! "There is some indication of some good deal of **preoperational** planning, perhaps some indication that they have experienced climbing in construction or in bridge work" New York City has spent 100s of millions of dollars to secure its landmarks in the years following the 911 attacks. But last year, 4 based jumpers **sneaked into** the World Trade Center and jumped off and in March, a 16 year old boy managed to climb to the top! Investigators are interested in a group of 5 people recorded by a Brooklyn Bridge camera! Scot, police say there appears to be no connection to terrorism. Michel Miller at the 131 year old Brooklyn Bridge! Thanks Michel!
