

(연예) Adele's new hit song "Hello"

JFKN.COM

She performed a new hit song "Hello" live for the first time last night. And questions are brewing about how she'll release her new highly anticipated album. 75% of Americans listen to music on lines. So her decision could influence the future of the music business. The release is still 2 weeks away.

"Hello" It's the call Adele fans have been anxiously awaiting. "I was wondering if after all these years, you'd like to meet to.." After a 4 year absence, the British pop star is back. "So, hello from the other side" Brian Hyat is a senior writer at Rolling Stone. When he spoke with Adele for their most recent cover story, she and her manager were still deciding how to release her latest work. "You can't make money from streaming." The album's first single Hello is the first song in history to have one million paid downloads in a single week and the video has a quarter of a billion You Tube views.

"Basically what's happening is the music industry is in transition. Adele is a test case for the blockbuster album in the age of streaming" which is fast becoming big business. Over the last decades, CD sales are down 80% while streaming now makes up 32% of record label digital revenue. But streaming policies have caused some big names to push back. Last year, Taylor Swift pulled all of her music from Spotify. This year, she threatened to withhold her blockbuster 1989 from Apple's streaming service until they agree to pay artists for their song during free trial period. But Adele's appeal is so universal. Sales may spike no matter where people find her music. Her last album sold 30 million copies worldwide, making it one of the most popular in the last 10 years. The big names Rihanna, One Direction and Justin Bieber have shifted their late November release dates, so they don't coincide with Adele.
