Good morning, April snow showers. Another blast of winter's coldest air this weekend. 100 million people waking to **frost** and freeze warnings this morning. Several inches of snow are expected today in the north east. Nearly a foot has already fallen in parts of the Midwest. When will winter leave? Dillon will break it down for us. **Disturbing** details, shocking **accusations** in serious charges this morning against former Speaker of the House Dennis Hastard. Prosecutors claim Hastard sexually abused 4 boys when he was a high school wrestling coach and agreed to pay more than 3 million dollars to keep one alleged victim quite. Most wanted captured. More than 7 months after a popular Texas dentist was killed, police have arrested a suspect in her death. A woman believed to be behind the plot **napped** in Mexico. And it comes just days after she was listed as one of the FBI most wanted. And Space X success. A huge **sigh of relief** after part of a rocket headed to the International Space Station land successfully on a platform floating in the middle of the ocean. It's a first after several failed missions proving the fifth time is the **charm**. Today, Saturday April 9th, 2016. From NBC news, this is Today with Matt Lauer and Savannah Guthrie, live from Studio 1A in Rockefeller Plaza.

And welcome to Today on this Saturday morning. I am Preg Nolgen and I am Schenell Johns. Dillon Dryer is here as well. Did you see that? They have on coats, heavy coats, big coats and hat. That is our top story this morning. A really another blast of winter. Here in April, 100 million under freeze advisories this weekend and it seems like we just can't say Good Bye to that snow. In parts of the northeast could see a few inches before the day's **dawn**. Dillon tracking all of that this morning. Just make it go away. I know, I am trying, I haven't figure out that power yet. But we are looking at this cold air to continue pull down into the northeast, into the Great Lakes. So the Artic airs in place, the cold air. You are feeling it already this morning with current temperatures. Markhead 16 degrees, Detroit 27, Pittsburg's at 32, New York's at 38. So that's why we are not really going to see the snow in New York. We gotta go to the higher elevations. That's where we'll see most of our accumulating snow back across Pennsylvania and West Virginia. We have your frost and freeze advisories in effect to this morning. And again tomorrow morning where temperatures will be running about 20 to 25 degrees below normal. We'll do that also for this afternoon. High temperatures only in the 30s and 40s and then here is your cold air for tomorrow morning again. 10s and 20s across the northeast.

We head out of this world now. A tremendous success for the Space X rocker after launching a cargo mission to the International Space Station. The main part of the booster touched down on a floating platform in the Atlantic. That's the first successful landing for the reusable rocket after 4 failed attempts. President Obama congratulated the team. He congratulated NASA as well saying because of innovators like them, American continues to lead space....
