I am Anne Mary Green with a look beyond this morning's headlines. Self-driving cars could hit the market by 2020. But right now, one company is working to make sure your ride is all about relaxation. KID DO OVER, San Francisco station KPIX got a preview. You know how makers of self-driving cars want you to seat back and enjoy the ride. Well, one company not only wants you seat back, they want you to seat way back. "The vision we have is that we want to put you in your living room even before you ride to home." Introducing YANFENG, the largest multi-billion dollar auto supplier, you've never heard of. They are the world's biggest maker of auto interiors, you know, all the plastic lever and metal inside the car.

YANFENG is starting up a 25-member innovation team in Sunnyvale and are trying to answer the question what will people do in their vehicle if they no longer have to drive. "We are in a position however to inspire car companies to build interiors that support the **autonomous** life style." YANFENG came up with a 4-part answer. The first is traditional mode where you seat just like you normally do. But with a tap on the app, it converts to family mode. The steering wheel **stows** itself away, the front seat's angle inward of 18 degrees and the two rear seats move in close together to better watch TV on the front display and yes, there is a refrigerator.

And then there is meeting mode where the rear seat stows away and the front passenger seat spins around. "Alright, here I go, I am rotating!" And yes, there are two **stowaway** desks. Finally lounge mode that **mimics** the viewing experience inside your living room, complete with a curb LED display **embedded** in the roof. Designers want you to reclaim that time that would have been spent driving yourself around, stressed out in a car. YANFENG insists all this is not just some designer's dream or Silicon Valley crazy talk. Like it or not, YANFENG is **ramping up** for the first self driving cars to hit the market by 2020. In Sunnyvale, KPIX 5.

And two country music legends agreed to perform together one last time. Danial Nottingham has this morning's entertainment headlines. Kenny Rodgers and Dally Parton have announced they will perform together for the last time this October. Rodger is retiring from touring and his performance with Parton will be part of an all-star farewell show in Nashville. The country music super stars have been singing together for more than 30 years and recorded hit duets like "Islands in the stream" That's your eye on entertainment. Danial Nottingham, CBS news, Los Angeles.

"Islands in the stream"

1. I am Anne Mary Green with a look beyond this morning's headlines.
공지...새로운 강의가 업로드 중일 때는, 스마트폰 강의가 일시 정지됩니다.
2. Self-driving cars could hit the market by 2020.
